

Abdelrahman Khaled Saad Zeaitar, MBA, PMP®

SEC Approved | SEC Authorized Card C1

Executive Summary

Result-oriented Electrical Engineer (PMP®) with an MBA and +8 years of experience in EHV/HV substation projects and power systems. SEC Authorized (C1) with a proven track record in testing, commissioning, and managing large-scale infrastructure projects including 380KV BSPs and submarine cable systems. Expert in aligning technical execution with strategic project management goals to ensure safety, quality, and timely delivery.

Education

1. Arab Academy for Science, Technology & Maritime Transport (AASTMT). *Alexandria, Egypt*
Master of Business Administration - MBA *2022 - 2025*
Graduation grade is 3.88
2. Beni Suef University. *Beni Suef, Egypt*
Postgraduate diploma of engineering of new and renewable energy. *2018 - 2019*
Graduation grade is Very Good (3.1).
3. Alexandria University. *Alexandria, Egypt*
Bachelor of electrical power and machines engineering. *2012 - 2017*
Graduation grade is Good (70%).
Graduation project grade is Excellent (A).

Certifications

1. Project Management Professional (PMP). *May 2024 – May 2030*
Project Management Institute (PMI).
2. National Grid Safety Rules, Qualification and Authorization. *Nov. 2025 – Nov. 2027*
Dammam Training Institute (Saudi Electricity Company).
3. Hazard Identification, Risk Assessment (HIRA). *Nov. 2025 – Nov. 2027*
Dammam Training Institute (Saudi Electricity Company).
4. Hazard Identification, Risk Assessment. *Nov. 2025 – Nov. 2027*
Dammam Training Institute (Saudi Electricity Company).
5. Operation Of suppression System Training *Dec. 2025 – Dec. 2026*
National Fire Fighting Manufacturing (NAFFCO)
6. Occupational Safety & Health Administration (OSHA). *July 2023*
Egyptian Engineers Syndicate & Engineering Safety Center.

Experience

1. **Testing and Commissioning Engineer** *Feb 2025 – Present*
System House for Electrical Panels Factory (SEP) – Al GIHAZ HOLDING
 - **Project: Construction of Taibah 380 KV BSP(Madinah).** Main Contractor: LINXON Company
 - **Project: Remote End Line from Mahd Al-Dahab 380KV S/S to Taibah 380KV S/S**
 - **Project: Makkah / ROSHAN 110/13.8 kV S/S.** Main Contractor: Haif Company
 - 1) Perform testing and commissioning of electrical equipment and Scheme Check EHV 380KV, HV 110KV, and switchgear 13.8KV.
 - 2) Testing and commissioning of substation components such as Auxiliary Relays, Current Transformers (CT), Voltage Transformers (VT), Timing for Circuit Breakers (CBs) & Disconnectors (DS), Contact Resistance, Secondary injection for VT loops & CT loops, CT Primary Injection and Open loop with SAS.

- 3) Test protection Relays, such as Siemens, ABB, and Test Trip relays, Lockout relays, and auxiliary relays, analyzing results including pickup voltage, drop-off, timing, and comparing them with the manufacturer's manual and FAT.
- 4) Prepare technical submittals, test reports, and system performance documentation.

2. Electrical Project Engineer

Jan 2021– Feb 2025

Telecom Egypt

- **Project: IEX Project & 2 Africa Submarine cables.**

- 1) Make schedules and plans for the implementation of electrical works and comprehensive follow-up.
- 2) Solving any obstacles that hinder the progress of the project.
- 3) Supervising the installation, testing and commissioning of CO Hybrid Power system and MV/LV systems including transformers, diesel generators, low-voltage panels, MV/LV cables, and earthing system and Attending factory acceptance tests (FAT).
- 4) Installation for multiple electrical projects including solar system, rectifier system, inverter system, batteries system, fire alarm systems, firefighting system and Uninterruptible Power Supply (UPS).
- 5) Tracking project progress, monitoring, identifying risks, and providing regular updates to PMO.

3. Electrical Technical Office Engineer

Feb 2019 – Jan 2021

Power Services Projects - PSP

- 1) Review and provide technical oversight and feedback for electrical design documents, including shop drawings, technical specifications, and schedules.
- 2) Design several low voltage Panels such as: Main & Sub distribution, Auto transfer switch (ATS), Power factor correction, Motor control center (MCC).
- 3) Good Knowledge & Experience in panels (ATS, Two out of three panels, MDBs, SMDB, EMDB, Phase Correction, Power Factor Correction, MCC panels, VFD, Soft starter).

Courses

1. Power Distribution & Light Current by Faculty of Engineering & Training & Consultancy at Engineering Center.
2. Classic Control by Egyptian Company for Engineering Training (EGYCET).
3. Batteries & Rectifiers Program by Telecom Egypt-T&D Sector.
4. Solar Panel station Program by Telecom Egypt-T&D Sector.

Programs

Very Good in using the following programs (AUTOCAD – DIALUX – ETAP – PV system – ECODIAL).

Personal Skills

- | | |
|--|-------------------------|
| - Microsoft Office [Word, PowerPoint Presentation, Excel]. | - Project management. |
| - Reliability, and Maintenance | - Presentation Skills. |
| - Time management. | - Team Work |
| | - Communication skills. |
| | - Leadership. |

Language Skills

1. Mother tongue (Arabic).
2. Very Good written, listening and spoken English.

Personal Data

1. Date of birth : 22 / 08 / 1994.
2. Nationality : Egyptian.
3. Social status : Married.
